PROFESSIONAL SUMMARY

Programming and Computer Science student at Qassim University focused on web development and databases. I build responsive websites and web apps end to end, from Figma prototypes to PHP/MySQL back ends. Team lead in several national hackathons, including a **first-place win in the Auctions Track of the Enfath Innovation Hackathon**. Seeking internship and freelance opportunities.

EDUCATION

Qassim University — 2025 – 2027

Diploma in Databases & Web Development

- Relevant coursework: Web Application Testing, Version Control with Git & GitHub, Database Systems, Web Development.

ACHIEVEMENTS

> **1st Place, Auctions Track — Enfath Innovation Hackathon.** Team lead of team kernel for *Mizan*, an auction-integrity intelligence layer.

PROJECTS & HACKATHONS

Sugar Heroes — Graduation Project — HTML · CSS · PHP

- Built a game-based diabetes awareness website for children with child and parent accounts, daily missions and rewards, a food guide by sugar level, and a parent progress view.

Mizan — Enfath Innovation Hackathon (1st Place) — Team Lead · React · Tailwind

- Led a 4-member team designing an integrity layer for auction platforms that flags unusual bidding with explainable indicators and secures records with chained cryptographic hashes.

Thamar — Food Loss & Waste Hackathon, Qassim University — Software Engineer · Oct 2026

- Computer-vision and sensor solution that routes produce in retail stores to sale, safe food processing or composting; targets a 20% reduction in waste within a 3-month pilot.

Policy Observatory — PHP · MySQL · AI API

- Web system that extracts the return and exchange policies of Saudi online stores and checks them against official requirements using AI; SHA-256 change detection, Arabic PDF reports and SSRF protection.

Daftar — Accounting System — PHP · MySQL

- Bilingual accounting system with invoicing, transactions, customers and suppliers, and a revenue/expense dashboard.

MIYAR — Riwad Hackathon, Barmajan Qassim — Team Lead

- Platform that links a business's records across government entities from its municipal license number, detects conflicts and issues a unified report.

Sir Tech — Tuwaiq Clubs Tech Projects Program (The Garage) — Team Lead

- Led a 6-member team building a smart assistant for EV owners in Saudi Arabia (real-world range, heat and A/C impact) and pitched it to judges and investors.

More

- Prototypes: InspectAI (Energy Hackathon, Ministry of Energy), Asset Passport (Enfath), Mabar, FURSA · Figma UI designs: Brewly Coffee, FurnitureCo, Mahami.

TECHNICAL SKILLS

Front end	HTML5, CSS3, JavaScript, React, Tailwind CSS, responsive and RTL layouts
Back end & data	PHP, SQL, MySQL, Python, REST and AI APIs, XAMPP
UI/UX design	Figma, wireframing, prototyping, user flows, Canva
Tools	Git, GitHub, VS Code, software testing
Languages & strengths	Arabic (native), English · Problem solving, innovation, teamwork, team leadership

CERTIFICATIONS

HRDF e-Training (Doroob)	Web Application Development · Importance of Data Science and AI (May 2025) · Word Program (May 2025) · Digital Marketing Tools and Techniques (Oct 2025)
Other	Python Basics · Learning Git & GitHub · Data Analysis Journey with Excel (workshop) · Enfath Innovation
